Introduction

This report presents an analysis of teacher salaries across different countries, education levels, and experience levels based on OECD data. The analysis provides insights into salary variations, progression patterns, and comparative statistics.

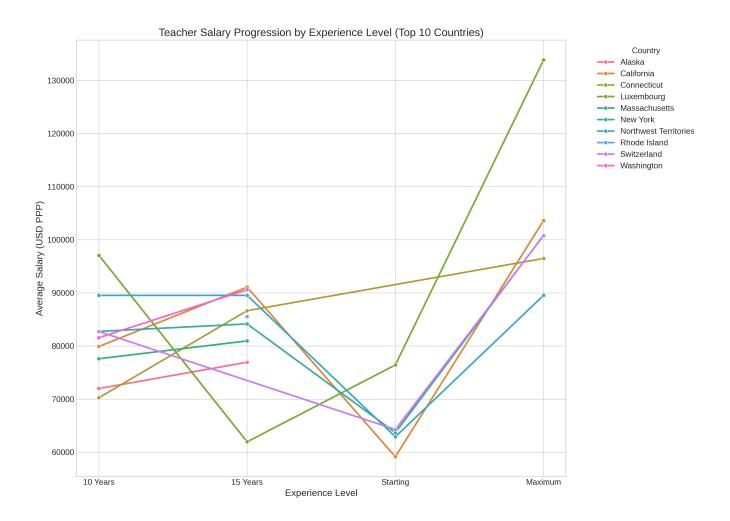

1. Teacher Salaries by Country

The chart below shows the top 20 countries by average teacher salary in USD PPP (Purchasing Power Parity). This allows for a fair comparison of teacher compensation across different economies.

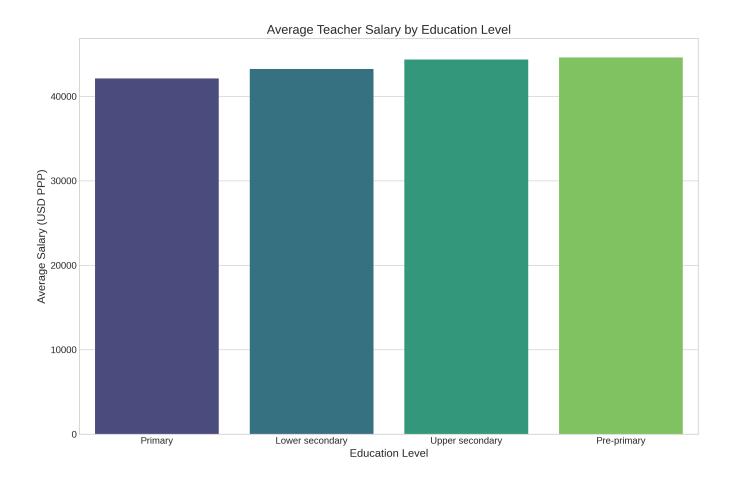

2. Salary Progression by Experience Level

This analysis examines how teacher salaries progress with experience, from starting salary to maximum salary. The chart shows the salary trajectory for the top 10 highest-paying countries.

3. Salary Comparison by Education Level

This chart compares average teacher salaries across different education levels, from pre-primary to upper secondary education. It highlights how compensation varies based on the level of education being taught.

4. Correlation Between Education Level and Salary

The heatmap below shows the relationship between education levels and teacher salaries across different countries. Darker colors indicate higher salaries.

_	Lower secondary	Pre-primary	Primary on Level	Upper secondary

Conclusion

The analysis reveals significant variations in teacher salaries across countries, education levels, and experience levels. Generally, salaries increase with experience and higher education levels. Countries with stronger economies tend to offer higher compensation for teachers, but there are notable exceptions that suggest policy and cultural factors also play important roles in determining teacher compensation.
